EDUCATION

2021 - 2025

ATLANTIC TECHNOLOGICAL
UNIVERSITY LETTERKENNY

- BSc Hons Computing 1.1

SKILLS

- Technical: Azure, Terraform, Kubernetes, Docker, CI/CD (Azure DevOps, GitHub), Networking (DNS, VNET), Monitoring, SQL Server, MongoDB, Azure pipelines, Veracode, SQL server, MongoDB, Kafka, SaaS, Sonar cloud, Veracode, Service desk
- Practices: Agile, Scrum, Kanban, ITIL, Change Management, Release Management

ADDITIONAL

- Teamwork: Gaelic football – collaboration and communication
- Discipline: Brazilian Jiu-Jitsu – focus under pressure and structured problem-solving
- Knowledge Sharing: Guest lecturing at ATU and internal roadshows

PROFILE SUMMARY

Graduate SRE/DevOps Engineer with hands-on experience in cloud provisioning, CI/CD automation, and observability, gained through delivering infrastructure and reliability solutions in enterprise environments from my role in the SRE/DevOps team at FinTrU. Known for problem-solving, discipline (from Brazilian Jiu-Jitsu), and teamwork (from football), complemented by strong communication and adaptability.

WORK EXPERIENCE

FinTrU Ireland

JULY 2025 - PRESENT

As a graduate engineer on the SRE team, I manage L2 triage for service desk tickets, end-user support, and Azure DevOps issues—fixing failed jobs and pipelines—while handling inventory tasks like renewals and secret rollovers.

ITIL and Release Management

- I apply ITIL processes for incidents, problems, and changes, serving as the SRE rep on bug triage calls. During releases, I run gates to scan for vulnerabilities and verify components before they hit higher environments.

Infrastructure and Cloud Tasks

- I set up cloud resources with Terraform IaC, linked it to Azure DevOps, tackled Azure networking tickets (VNETs, DNS), and pitched in on certificate renewals. For observability, I build Log Insights dashboards with rules to spot issues fast.
- Contributed to change management and CAB processes by preparing summaries and automating daily reporting scripts.
- Gained exposure to vendor tools (ABBYY OCR/KYC) and assisted with data-related tasks such as retention and masking.
- Worked within an Agile/Scrum environment, attending stand-ups, using Kanban boards, and contributing to quarterly planning.
- Developed internal documentation for workflows and best practices to support team knowledge sharing.
- I also had a chance to return to ATU to assist for a guest lecturing session which was a great experience.

Aldi Stores

2021 - 2025

Store Assistant

- Efficiently manage inventory, operate cash registers, and provide exceptional customer service at Aldi, ensuring a smooth shopping experience for all patrons.
- Maintain immaculate store appearance, meticulously organize shelves, and conduct thorough quality checks to uphold Aldi's high standards.
- Foster a positive team environment, assist colleagues during peak hours, and contribute to a cohesive work atmosphere that enhances overall store performance.
